

# Method and System for Specifying a Selection of Content Segments

## Stored in Different Formats

### Abstract

A method, system and program product are described for specifying a selection of content  
5 segments stored in different formats. The invention involves receiving specification of a  
plurality of portions of first content stored in a first format, the specification identifying  
beginning and ending frames for each portion, and building a list comprising a starting mark and  
ending mark for each selected portion of first content, the list for use in accessing corresponding  
portions of the same content stored as second content in a second format.
